**Missouri Weekly Hay Summary 01/03/19**

Although temperatures have been freezing at nights, the days are still warming enough that mud continues to be much more of an issue than snow so far this feeding season. There continues to be a lot of folks looking for hay but generally it seems to be smaller producers looking for a few small squares or one or two big rounds. There is hay for sale but distance seems to be the problem unlike most years many are having to go farther than they are used too and not just to a nearby neighbor. After the dry summer, most local farmers just do not have any surplus to part with. The supply of hay light to moderate. Hay prices are steady. Hay demand is moderate to good. The Missouri Department of Agriculture has a hay directory available for both buyers and sellers. To be listed, or for a directory visit <http://mda.mo.gov/abd/haydirectory/> for listings of hay <http://agebb.missouri.edu/haylst/> (All prices f.o.b. and per ton unless specified and on most recent reported sales price listed as round bales based generally on 5x6 bales with weights of approximately 1200-1500 lbs).
